

# ZANE'S STRUCTURES

Howard Zane - Ph: 410-730-1036 or email [hzane1@verizon.net](mailto:hzane1@verizon.net)

Item #	Description	HO Dims	HO \$	O Dims	O \$
421	Coal Tower	9.8" X 5.5"	1,895	18" X 10"	2,295

This design services three tracks (center, left and right) and is of all wood construction. There are two chutes in center, two on one side and three on the other. Coal is lifted from in-ground dump (by customer, but I can build this if desired) into tower through external elevator. Note included service shack in photo 94. This is a serious moose of a structure and design may be easily modified to fit most realistic budgets. It connects to sand facility (Item 420). Design would have been from approximately 1920-1940 and in use up until the mid 50's.
